Operational metrics by channel

Metric	Email / Web Form	Messaging
Tickets Created Monthly (average over last 12 months)	1192.4	89.8
First Reply Time (median, calendar)	25 min	21 min
Full Resolution Time (median, calendar)	20 min	21h 17m
Requester Wait Time (median, calendar)	11 min	2h 36m
Satisfaction Score	100.0%	No data
% Tickets Rated (of solved tickets)	3.3%	0.0%

Methodology and coverage

Control	Result
Ticket volume source	Exact monthly Zendesk Search Count for Email/Web Form and native Messaging
Duration and satisfaction source	Bounded stratified API sample: up to 60 tickets from five monthly cohorts across the 12-month window. Monthly Email/Web and Messaging volumes use exact Zendesk Search Count queries.
Full-population KPI validation	Zendesk Explore is the authoritative full-population reporting surface for these KPIs. The public Zendesk API reference does not expose an Explore query-results endpoint to this single-ZIP app. Validate reply time, resolution time, requester wait, CSAT and rated ratio in the Support and Messaging Explore datasets before final client use; API and Explore results can differ because their calculations, date filters, processing and refresh timing differ.
Metric-set coverage	123 of 123 sampled tickets (100.0%)
Time statistic	Calendar-time median; average and sample size remain in the app detail
Scoring guardrail	Unverifiable configuration, usage, process or unavailable API claims remain Needs review and earn no automatic points

Queue and experience risks

Signal	Value
Unsolved	709
Stale unsolved >7d	3
Stale pending >7d	3
Negative CSAT	54
Suspended	903

Agent and licence signals

Signal	Value
Active agents	27
Light agents	3

Detailed 258-point assessment

Question	Answer	Weight	Phase / category	Evidence and source
Is there a Zendesk Help Centre present?	Yes	10	Set Strong Foundations / Self-Service Centre	13 categories and 119 articles detected. Source: Help Center API
Has the URL been redirected via CNAME to a recognisable URL (support.experts.co.za)?	Yes	2	Getting Good / Self-Service Centre	3 brand host mapping(s) detected. Source: Brands API
Are you making use of public profiles, giving access to tickets to logged in users?	Needs review	2	Getting Good / Self-Service Centre	The API exposes end-user settings but cannot prove the intended portal permission experience. Source: Manual verification
Is the Help Centre Branded?	Yes	5	Getting Good / Self-Service Centre	Brand logo, URL, or host mapping detected. Source: Brands API
Are you using a custom theme?	Needs review	5	Getting Great / Self-Service Centre	12 Guide theme record(s) were returned, but the API does not prove which theme is live or how extensively it is customised. Source: Guide Themes API and visual review
Do you have a custom built, bespoke Help Centre that matches their actual website?	Needs review	5	Becoming Best in Class / Self-Service Centre	A visual and functional comparison with the company website is required. Source: Manual verification
Are you using Dynamic forms?	Yes	6	Getting Good / Self-Service Centre	15 form(s) contain conditional rules. Source: Ticket Forms API
Do On-Hold Tickets open up after a specified time?	Yes	5	Getting Good / Business Rules	A single automation contains timed on-hold-to-open evidence. Source: Automations API
Do Pending tickets solve after a specified amount of time?	Yes	5	Getting Good / Business Rules	A single automation contains timed pending-to-solved evidence. Source: Automations API
Omnichannel/Automatic Routing present?	Yes	9	Getting Good / Business Rules	Omnichannel routing is enabled. Source: Account Settings API
Predictive routing enabled?	Needs review	4	Becoming Best in Class / Business Rules	No reliable predictive-routing flag is exposed in the standard response. Source: Account Settings API and manual verification
Grouped using accordion?	Yes	1	Set Strong Foundations / Empowered Employees	Nested view naming using :: was detected. Source: Views API
Do you use Emojis in your views?	Yes	1	Getting Good / Empowered Employees	Non-ASCII visual markers were detected in view titles. Source: Views API
Are there specific views for management/agents?	Needs review	2	Getting Good / Empowered Employees	View audience cannot be confirmed from naming alone. Source: Views API
Are you using the Play Button?	Needs review	2	Getting Good / Empowered Employees	The API response does not reliably prove day-to-day Play Button use. Source: Manual verification
Are your views set up to put the most important ticket at the top?	Yes	3	Getting Good / Empowered Employees	Priority/SLA sorting evidence was detected in a view. Source: Views API
Are there custom views?	Yes	7	Set Strong Foundations / Empowered Employees	66 active/custom view records were returned. Source: Views API
Are you using Guided Mode?	No	5	Getting Great / Empowered Employees	Focus/guided mode is not enabled. Source: Account Settings API
Phone Connected?	Yes	5	Set Strong Foundations / Omnichannel	Voice ticket traffic was observed in the report window. Source: Incremental Tickets API
Email Connected?	Yes	5	Set Strong Foundations / Omnichannel	10 recipient address(es) and recent email/web tickets were detected. Source: Recipient Addresses and Tickets APIs
Messaging Connected?	Yes	5	Set Strong Foundations / Omnichannel	1077 messaging ticket(s) were observed in the report window. Source: Tickets API

Question	Answer	Weight	Phase / category	Evidence and source
WhatsApp Connected?	Needs review	5	Set Strong Foundations / Omnichannel	No WhatsApp traffic was observed; verify the channel setup directly. Source: Tickets API
Social Media Messaging Channels Connected?	Needs review	5	Getting Good / Omnichannel	No social messaging traffic was observed; verify channel setup directly. Source: Tickets API
Do Google Reviews create tickets?	Needs review	2	Getting Great / Omnichannel	Channel-framework tickets can be detected, but the originating review integration needs confirmation. Source: Manual verification
Do App reviews create tickets?	Needs review	2	Getting Great / Omnichannel	Channel-framework tickets can be detected, but the originating review integration needs confirmation. Source: Manual verification
If you have an app, are you using the SDK? (Native in-app chat and knowledge surfacing)	Needs review	2	Becoming Best in Class / Omnichannel	No recent SDK-originated ticket was observed. Source: Tickets API
Have custom email addresses been set up correctly or at all? (SPF, DNS, TXT)	Yes	5	Set Strong Foundations / Omnichannel	10 recipient address(es) expose a passing verification status. Source: Recipient Addresses API
Is there a Basic Bot set up to handle all messaging channels?	Needs review	4	Getting Good / Move to Messaging	Bot flow configuration is not fully exposed by the standard Support APIs. Source: Manual verification
Is there an Advanced AI Agent in place?	Needs review	5	Becoming Best in Class / Move to Messaging	AI-related settings are active, but they do not prove an Advanced AI Agent is deployed on a live channel. Source: Account Settings API and manual verification
Have Agents done training?	Needs review	10	Set Strong Foundations / Empowered Employees	This is a people/process question and requires confirmation. Source: Manual verification
Have Admins done training?	Needs review	10	Getting Good / Empowered Employees	This is a people/process question and requires confirmation. Source: Manual verification
Admins signed up to receive important updates via Zendesk thread? (Ask) This Link	Needs review	2	Getting Great / Empowered Employees	This is a people/process question and requires confirmation. Source: Manual verification
Making use of Light Agents?	Yes	2	Getting Great / Empowered Employees	3 light agent(s) were detected. Source: Users API
Custom-build CRM ZAF?	Needs review	1	Becoming Best in Class / Empowered Employees	An installed app has CRM-related naming, but metadata cannot prove it is a custom-built ZAF CRM. Source: App Installations API and implementation review
Are notification triggers customised to include your name, ticket number and SLA expectations?	Needs review	3	Getting Good / Business Rules	Notification-rule placeholders were detected, but the exact customer-facing wording and SLA expectation must be reviewed. Source: Triggers API and content review
Are notification triggers optimised for inside and outside of business hours?	Yes	3	Getting Good / Business Rules	A single rule contains a business-hours condition. Source: Triggers and Automations APIs
Has the toolbar color been customised?	Yes	1	Getting Good / Business Rules	A toolbar/header colour is configured. Source: Account Settings API
Are all the licenses being used?	Needs review	5	Set Strong Foundations / Reporting & Insights	Active seats are counted by licence type and Zendesk/custom role. Inactive-user analysis is intentionally excluded from this report. Source: Users API and manual commercial review
Is there currently a QA process in place?	Needs review	5	Getting Great / Reporting & Insights	QA product entitlement does not prove an active operational QA process. Source: Manual verification
Are you leveraging Zendesk's Automatic Quality Assurance Tool?	Needs review	5	Becoming Best in Class / Reporting & Insights	QA product entitlement does not prove an active operational QA process. Source: Manual verification
Are Intent, Sentiment, and Language detection being mapped?	Needs review	5	Getting Great / Reporting & Insights	Intent, sentiment, and language fields were detected, but field presence does not prove

Question	Answer	Weight	Phase / category	Evidence and source
				active mapping and reporting. Source: Ticket Fields API and workflow review
Is Macro Suggestions for agents turned on?	Needs review	3	Getting Great / Empowered Employees	Copilot feature configuration requires product-specific verification. Source: Manual verification
Is Zendesk suggesting responses for agents based on available knowledge sources and Procedures?	Needs review	5	Getting Good / Empowered Employees	Copilot feature configuration requires product-specific verification. Source: Manual verification
Are you leveraging Zendesk's Workforce Management Tool?	Needs review	5	Becoming Best in Class / Reporting & Insights	WFM-related settings or an installation were detected, but active operational use cannot be proven from installation metadata. Source: Account Settings and Apps APIs plus usage review
Is SSO (Single Sign-On) enabled?	No	1	Getting Great / Empowered Employees	No SSO configuration was detected. Source: Security Settings API
Do you have a schedule(s) set-up?	Yes	2	Set Strong Foundations / Business Rules	2 business-hours schedule(s) were detected. Source: Business Hours API
Do you make use of Macros?	Yes	5	Set Strong Foundations / Empowered Employees	1380 macro record(s) were detected. Source: Macros API
Are your triggers classified into categories?	Yes	1	Set Strong Foundations / Business Rules	13 trigger categories detected. Source: Trigger Categories API
Do emails have a custom html header and footer?	Yes	2	Getting Great / Business Rules	Custom email template/header/footer settings were returned. Source: Account Settings API
Do you have automatic Agent Signatures set up?	No	1	Set Strong Foundations / Business Rules	No agent signatures were detected. Source: Users API
Have SLA's been set up?	Yes	4	Set Strong Foundations / Reporting & Insights	11 SLA policies detected. Source: SLA Policies API
Escalation Automations for SLA's	Yes	2	Getting Good / Business Rules	SLA escalation rule evidence was detected. Source: Triggers and Automations APIs
Are you using Side-Conversations?	Yes	2	Getting Good / Empowered Employees	Side Conversations settings are active. Source: Account Settings API
Are you making use of custom Agent Roles?	Yes	1	Getting Good / Empowered Employees	11 custom role(s) were detected. Source: Custom Roles API
Are you capturing CSAT on all channels?	Needs review	10	Set Strong Foundations / Reporting & Insights	CSAT is enabled, but no rated Messaging tickets were observed in the sample; Email/Web has 3 rated ticket(s). This does not prove survey configuration is absent. Source: Account Settings and Incremental Tickets APIs
Are you capturing Contact Drivers?	Needs review	5	Set Strong Foundations / Reporting & Insights	A contact-driver style field was detected, but field presence alone does not prove agents populate it consistently. Source: Ticket Fields API and data-quality review
Are you reporting on Contact Drivers through a pie chart, daily, weekly and monthly?	Needs review	10	Set Strong Foundations / Reporting & Insights	Explore dashboard contents and schedules are not available through the standard Support API. Source: Manual verification
Are you tracking/monitoring KPIO's such as First Reply, Full Resolution and REquester Wait times?	Needs review	10	Set Strong Foundations / Reporting & Insights	This report calculated first reply, full resolution, and requester wait metrics from 123 in-window metric sets, but it cannot prove the client was already monitoring them. Source: Incremental Tickets API and reporting-process review
Exporting reports automatically?	Needs review	3	Getting Good / Reporting & Insights	Explore delivery schedules are not exposed by the standard Support API. Source: Manual verification
Are you capturing systems Requests and reporting on these?	Needs review	5	Getting Good / Empowered Employees	A systems-request style field was detected, but field presence does not prove consistent capture or reporting. Source: Ticket Fields API and reporting-process review

Question	Answer	Weight	Phase / category	Evidence and source
Time-Tracking app	Yes	5	Getting Great / Reporting & Insights	A time-tracking app installation was detected. Source: App Installations API
